

Wadebridge School Former Students

Jamie Witts
Class of 2007
Design
Engineer

Further Education Wadebridge 6th Form - Maths, ICT, Physics & History

Higher Education Queen Mary University London
2:1 BEng Mechanical Engineering

Jamie says.....

University was brilliant! Hard work, late nights, parties and deadlines!

I made good friends and had a great time! I got involved in loads of stuff; worked at the Student Union; ran the London Marathon for charity; played football for the University team. All this meant that I met more people and absolutely made the most of my 3 years in London!

Working alongside some of the most knowledgeable people I've met has given me the opportunity to take the theoretical knowledge I acquired at University and apply it to real world Engineering situations. My job has given me the opportunity to work as part of a team on projects, from the initial design phase to the .delivery of a unit to the customer.

.....wise words

My key piece of advice would be to get involved in as much as you can, whenever you can, even if you're not sure you'll like it! It gives you the opportunity to meet new people who you may not normally come across; you can try new things too. Some you'll love , some you'll hate—but at least you can say you tried!
