

Year 9 pupils, Nat Robinson, Tom Oatley and Joe Wilkins entered their completed Bronze CREST award into the Big Bang South West, National Science and Engineering Competition. The project for their award was an investigation into which fuel (diesel, unleaded petrol or super unleaded) had the highest energy output. They worked hard for many months researching, planning, investigating and analysing results. All their hard work culminated on Thursday 25th June when they won the South West competition and earned a well-deserved place in the National Science and Engineering Competition to be held in Birmingham next year.

Ready for the judges
