

Geography

Summer Project 2013

For those of you wishing to take 'A' level Geography from September 2013, we would like you to complete some work over the summer break.

Choose **two** of the following topics.

- *Climate Change (Global warming)*
- *Natural Hazards (earthquakes, volcanic eruptions, tropical storms etc.)*
- *Globalisation (MNC's, Global Organisations)*
- *Population (Mega-cities, migration, population change)*

Task

For each of your chosen topics you need to write a **one page review** of a relevant news item from a newspaper, website, documentary, journal or other relevant document.

Remember to name the source and summarise what it is about. Include relevant facts and evidence linked to the topic you have chosen.
