

After a successful win at the regional competition in June 2015, Year 10 students Tom Oatley, Nat Robinson, Joe Wilkins and Haydn Cooper travelled to the National Exhibition Centre in Birmingham for the Finals of the National Science and Engineering Competition. This event showcases the best of Science, Technology, Engineering and Maths projects by young people, great show and performances as well as activities and freebie giveaways from large, successful companies.

The Wadebridge school teams were judged four times for:

- The Core Competition prizes – Top Prize £1500
- The best CREST Award Presentations
- The royal Society of Chemistry prize for excellent in chemistry related projects
- M and S's prizes for Sustainability in the future

Due to the tough competition Wadebridge School came home empty handed – never the less, a great time and experience was had by all.
